Our Fixed Interest Investment Philosophy

Clarity. Simplicity. Results.

We understand how behavioural biases and market sentiment can shape the bond market. Our Fixed Interest philosophy revolves around capturing the true value of assets, transcending the need for unnecessary complexities, and using inference extensively.

We believe in straightforward strategies that cut through the noise, utilising fundamental research and quantitative techniques rather than relying on hazardous forecasting.

This way, clients can experience the strategic edge of Vunani Fund Manager's Fixed Interest approach, where disciplined analysis meets quantitative precision.

Our Fixed Interest Investment Process

We actively seek contrarian opportunities, taking advantage of market trends driven by excessive complacency or pessimism.

Our approach aims to enhance returns through moderate active duration positions and optimizing a well-balanced, diversified blend of yield enhancement.

Using our advanced valuation models, we meticulously evaluate fixed interest securities, scouting for potential mis-valuations. Our proprietary screening system identifies yield curve variations, spread inconsistencies and other crucial factors.

Through this process, we can spot attractive investment prospects and act swiftly to capitalise on our findings.

Portfolio Construction

Our portfolio construction is tailored to unlock the full potential of our clients' investments.

Our sophisticated models and systems allow us to craft portfolios that transcend expectations and capture a variety of factors and risk metrics.

When entrusted with a new fund, we waste no time in putting it to work. We ensure immediate investment, utilising the stability and liquidity of RSA bonds.

From there, we embark on a patient and calculated journey towards cultivating a yield-enhanced portfolio.

Risk Management

Our clients take comfort in our ability to handle their investments through any market conditions.

To ensure the safety of our clients' investments, we adopt a sound approach to risk management. Our job is not to eschew risk but to properly calibrate it and incorporate it into portfolio construction.

Quantitative risk measures are calculated and monitored daily for each portfolio and its corresponding benchmark. We also pay close attention to the individual holdings within the portfolio and keep a watchful eye on exposures related to specific issuers.
