Our Global Equity Investment Process

Our equity investment process seeks to identify a company's strategic competitive advantage and determine the sustainability of that advantage. We search for the qualities that are fundamental in setting winning companies apart from the rest.

We also utilize a scenario-driven approach to investment thesis and valuation and integrate these into active portfolio management

Our four-pillar fundamental framework assesses each company based on:

INDUSTRY
LANDSCAPE

COMPETITIVE
ADVANTAGE

SUSTAINABILITY

MANAGEMENT

Portfolio Construction

When it comes to constructing the optimal portfolio, we aim to strike the perfect balance between risk and reward.

Our portfolio construction thrives on the seamless integration of fundamental risk analysis and valuation insights, enabling us to make informed investment decisions with confidence.

Leveraging our scenario-based approach to investment cases and valuations, we build portfolios with longer holding periods and lower turnover. This allows us to act in real-time, staying one step ahead of ever-changing market conditions.

This way, we can give our clients what they desire most: lower risk, higher returns, tailored to their needs.

Risk Management

Maximal Returns, Minimal Risk

Our clients take comfort in our ability to handle their investments through any market conditions. We make sure of that with our thorough risk management process. Risk is monitored daily and evaluated weekly through our in-house system, enabling us to remain ahead of the curve when it comes to minimizing risk while maximizing returns.
